RE: ELKALUB FLC 367 P
Category Code: H1
NSF Registration No. 146227

Dear Mr. Joachim Hof:

NSF has processed the application for Registration of **ELKALUB FLC 367 P** to the NSF International Registration Guidelines for Proprietary Substances and Nonfood Compounds (2009), which are available at www.nsfwhitebook.org. The NSF Nonfood Compounds Registration Program is a continuation of the USDA product approval and listing program, which is based on meeting regulatory requirements including FDA 21 CFR for appropriate use, ingredient and labeling review.

This product is acceptable as a lubricant with incidental food contact (H1) for use in and around food processing areas. Such compounds may be used on food processing equipment as a protective anti-rust film, as a release agent on gaskets or seals of tank closures, and as a lubricant for machine parts and equipment in locations in which there is a potential exposure of the lubricated part to food. The amount used should be the minimum required to accomplish the desired technical effect on the equipment. If used as an anti-rust film, the compound must be removed from the equipment surface by washing or wiping, as required to leave the surface effectively free of any substance which could be transferred to food being processed.

This letter is the only confirmation that the formulation complies with the NSF Guidelines. At your request, the product will not be listed on the NSF website. The product's Registration can be verified by contacting NSF directly. Distributors' brands can be sub-registered without disclosing the formulation by having distributors specify the NSF Registration Number in their applications.

NSF Listing of all Registered Nonfood compounds by NSF International is not an endorsement of those compounds, or of any performance or efficiency claims made by the manufacturer.

Changes in formulation or label, without the prior written consent of NSF will void Registration.

Sincerely,

A handwritten signature in black ink, appearing to read "Clifton Mclellan".
