

Technical Datasheet

ELKALUB GLS 965/N000

GLS 965/N000 is a synthetic semi-liquid lubricating grease with outstanding working performance. Specially recommended for lubricating tasks in higher temperature areas. This semi-liquid lubricating grease offers best conveying characteristics in central lubricating units.

Applications: chains and gears operating in high-temperature working modes.

Chemical composition: Synthetic oil, active substances, organic -, synthetic thickener,

Working temperatures: -40°C till +170°C (short term +220°C)

Density (at + 20°C): approx.. 0,93 g/cm³

Dropping point: > 180°C

Consistency class: 000

Base oil viscosity: : ISO VG 460

These data reflect our knowledge of today and were elaborated to our best knowledge.

Technical modifications and improvements reserved.
