

Technical data sheet
VP 806
Oil for industrial sewing machines

Nonfood Compounds
Program Listed (H1)
(Registration 138303)

The oil VP 806 has been designed for the hard application of sewing up sacks for sugar. However, it can also be used for all types of sewing machines requiring an oil of the viscosity ISO VG 32.

Data:

Chemical Composition:	PAO, ester, additives
Appearance:	clear, colourless
Recommended application temperature:	-30°C bis +140°C
Kinematic viscosity:	ISO VG 32
Density:	0,83 g/cm ³
4 ball tester – welding load:	1.800 N
4 ball tester wear calotte:	0,5mm (1000 N, 1 h, 1440 rounds/min)

These data reflect our present day knowledge and have been issued to the best of our knowledge and belief. We reserve the right to change and/or supplement them..
