

Product Description
ELKALUB FLC 400
High-temperature spray

FLC 400 is a fully synthetic special spray for the lubrication of metal parts in the high temperature range up to +250° C, short time +300°C.

FLC 400 forms a very thin, highly loadable film. There do not remain any residues which would harm the lubrication.

Attention:

A perfect adherence of the lubrication film on the metal surface is only given after a thorough cleaning of oil, grease and impurities.

Examples for use:

Embossing presses for hot process, slideways, chains, bearings, etc
