

Product Description

ELKALUB FLC 8 H1 Adhesive lubricant

Nonfood Compounds
Program Listed (H1)
(Registration 138247)

FLC 8 H1 is our chain lubricant LA 8 H1 in spray form. LA 8 H1 is a further development of our chain lubricant LA 8.

The lubricating film has a good spreading capability and protects against corrosion. It has excellent boundary lubrication properties and is very adhesive and resistant to centrifugation up to 80° C.

FLC 8 H 1 is recommended for use in heavy drive chains, cams, disk cams, open cogwheels, slideways and spindles.

Technical data of base material

Chemical composition	Synthetic oil, white oil, ester, synthetic organic thickener, additives
Appearance:	white
Operating temperature	-20! Up to +100° C
Wear mark	0,46 mm (100 N, 1 min)
Iron corrosion	0 to no corrosion (1% NaCl, 4h, 60° C)

These data reflect our knowledge as of today and were issued in good faith. We reserve the right to change and/or supplement them.
