

**Product Description**  
**ELKALUB FLC 8010**  
**Synthetic Oil Spray**

**FLC 8010** is an oil spray with a very high creeping ability which is miscible with mineral oils and most of the synthetic oils (PAO, ester, polyglycols). The product has excellent extreme pressure and anticorrosion properties.

**FLC 8010** possesses particularly good sliding friction properties.

The oil spray is resistant to UV-rays.

Temperatures of use:	-30° C up to +130° C
Base oil viscosity at 40° C:	200 mm <sup>2</sup> /s ± 10%
Density of base oil at 20° C:	c. 1 g/cm <sup>3</sup>

**Examples for application:**

Maintenance of grippers in printing presses with UV-dryers, slide bearings, joints, chains, pivots, slideways.
