

Product description
ELKALUB FLC 1014
oil spray PTFE (Teflon) enriched

the spray **FLC 1014** has its base on our lubricating concentrate ELKALUB LA 1 and is upgraded by PTFE (polytetrafluorethylene). The additive PTFE support the high technical loadability of LA 1 and reduce all kinds of friction.

FLC 1014 offer a high anti-aging stability is chemically neutral, dust and dirt dissolving. It doesn't resinify and provides best anti-corrosion properties.

The good creeping ability of **FLC 1014** ensures paramount lubrication also in narrow fits. .

FLC 1014 works best in temperature areas of -20°C till +120°C.

examples for use:

guides, joints, fits, transmission chains, gripper of printing machines, spindles. That implies at all locations where sliding motion under load is given.
