

product description
ELKALUB FLC 9010
synthetic oilspray

Nonfood Compounds
Program Listed (H1)
(Registration 138648)

FLC 9010 is an oil spray, based on our long time approved synthetic oil LFC 9220 (ISO VG 220). The spray slips into narrow gaps and slits and offers paramount lubrication and moistening at all places to be greased. A unique anti-corrosion lub film guarantees best protection against wear.

FLC 9010 is recommended to be used in temperature frames -35°C till $+160^{\circ}\text{C}$.

ready for use with following applications:

gear chains, joints, hinges, guides, gripper shafts of printing machines, slide- and roller bearings.

remarks:

in all practical working situations where contraction with water, steam, acids and alkalis is obvious (pH-values 2-11 at 50°C) it is better to chose our grease spray with H1 approval ELKALUB FLC 367.
